Mohamadi,

We have a subject on the long term SCoR (AA01304) who did not return on 22 Sep for her Week 4 visit. We finally reached her today. She needed to leave town for a family emergency and was unable to come in on Sunday. She is still in Florida, but would like to remain on study and was wondering if she could be able to complete her Week 4 events this Sunday, 29 Sep.

The protocol calls for a 3 day window for all visits. Would you like to take a deviation for this or should she be removed from the study. At this time, I do not know if she has smoked another type of cigarette, but I would probably put money on it!

Please advise.

Thanks
Kim
